

Contact Wire

Sumitomo Electric has been providing high quality contact wire since 1914, based on the latest technology of copper and copper alloy casting, rolling and drawing. We have been the largest supplier of contact wire in Japan for many years. Our high-strength Cu-Sn copper alloy contact wire is suitable for high-speed railway and it has been installed in "Shinkansen" and "Taiwan High-Speed Railway" etc.

Specification

Type	Size (mm ²)	Min. tensile strength (MPa)	Min. conductivity (%IACS)
High strength Cu-Sn	110 - 170	430	70
Cu-Sn	85 - 170	350	70
Cu-Ag	85 - 170	350	97
Cu-ETP	85 - 170	340	97.5

*Sumitomo would be corresponding to several standards such as EN, JIS, etc.

Supply Record

Japan Railway Group, private railway companies in Japan, Taiwan, China, Malaysia etc
Market share in Japan is about 50 percent in 2015
(The quantity of delivery is approximately 11,000 km in past ten years)
